Waste Challenge: Project OnePager

Project or team name:

Team members (full names) **and their study programme**:

Project category (cities, energy or consumption):

Potential for impact

What is the project about (project description) and how does it contribute to a more sustainable future?

What is the target problem for your project and how do you solve it?

Novelty

How is the solution innovative comparing to existing ones (if exists)?

Feasibility

How do you provide/present the feasibility of your solution?

What would be your ambition/the next steps with the project?

Inclusivity (industry, potential users, multiple disciplines engaged)

Who are the stakeholders (company partners, expected users, etc.) involved in the process of the solution development?
