

## Summary of projects from shortlisted EuroTeQ Collider teams at TalTech participating at the EuroTeQathon.

### **Challenge - Make the most of every piece of urban greenery**

**Team name** - Antscape

#### **Summary of the project**

Antscape combats urban environmental degradation by providing a service that helps local governments and landscape designers efficiently plan and maintain green spaces. The solution uses data integration and automation to reduce manual work, ensure compliance with new legal requirements for nature restoration, and enhance biodiversity. It benefits landscape designers, local governments, and the wider community by promoting urban biodiversity, reducing greenhouse gas emissions, and improving environmental health, aligning with SDGs for sustainable cities, climate action, and life on land.
